SUMMARY

- A dedicated Computer Science graduate with a strong desire to apply academic knowledge and teaching skills in a renowned university. Committed to delivering quality education, promoting student engagement, and contributing to the academic community.

EDUCATION

- **Jahangirnagar University** 2020-2025
B.s.c 3.90/Percentage: 97.50
- **Kafiluddin University College** 2018
H.S.C, Lakshmipur 4.67/Percentage: 93.40
- **Pratapganj High School** 2016
S.S.C, Lakshmipur 5.00/Percentage: 100

TECHNICAL SKILLS AND INTERESTS

Programming Languages: C, C++, JAVA, Python

Developer Tools: Visual Studio, Bootstrap

Version Control Systems: Git

CI/CD

Cloud/Databases: SQL, MySQL

Soft Skills: Patience, Creativity, Time Management, Communication

Software Tools: Xampp, Code::block, Slack, Trello, Toggl, Discord, Overleaf, Visual Paradigm, Draw.io, Matlab

Web Development Tools: HTML5, CSS, JavaScript

Areas of Interest: Networking and Communication, Machine Learning, Mobile Application Development

PERSONAL PROJECTS

- **Smart Class Routine Management System** 14-11-2024
Web Based Project which optimizes and manages class schedules efficiently
 - Tools & technologies used: **HTML5, CSS, JavaScript, Bootstrap, React, Node.js, MySQL, Git, JSDoc, Github Action, Mocha, Chai, Trello, Toggl, Discord**
 - Efficiently manage and optimize class schedules with features like filtering, rescheduling, and academic calendar integration.(Dynamic Class Scheduling Platform)
 - Prepared **Documentation, Wiki reports and SRS**
 - Managed the project works with Trello, maintain time scheduling with Toggl and communicated with team members via Discord
 - Implemented **TDD, CI/CD, Github Actions, Agile Scrums and Meeting Retrospectives for project efficiency.**
 - Github location: <https://github.com/JUCSE49-Mavericks/Smart-Class-Routine-Management-System/wiki>
- **CSE Mentor** 10-10-2024
A Mobile App for Computer Science Students to enhance Learning(Course Information, User Information)
 - Tools & technologies used: **Android Studio, Git, Java, Firebase**
 - Offer personalized learning resources, guidance, and mentorship for computer science students, helping them excel in their studies and career paths (Mobile App Based Learning Platform)
 - Authentication **implemented by Firebase Realtime Database.**
 - Github location: <https://github.com/TrishaSarkar174/CSEMentorLearningApp>
- **Fruit disease detection using Feature Extraction and Deep Learning**
Ongoing research on automated fruit disease detection
 - Tools & technologies used: **Matlab, Overleaf**
- **IOT Based Smart Street Lighting with Solar Charging** 22-05-2025
An IoT-based project that automates lighting using sensors and enables remote monitoring.
 - Tools & technologies used: **NodeMCU ESP8266, Arduino IDE, Blynk App, LDR, IR Sensor, Temperature Sensor, Current Sensor, Solar Panel**
 - Developed an **IoT-based smart street lighting system powered by solar energy** that adjusts brightness based on motion and ambient light, with real-time monitoring and control via Blynk app and web dashboard.
- **Fire Fighting Car using Arduino** 13-03-2024
An Arduino car which detects fire nearby and Turn out fire using water from water tank
 - Tools & technologies used: **Arduino**

ACHIEVEMENTS

- **Certified for completion of Responsive Web Design** From FreeCodeCamp *2023*
- **Certified for completion of JavaScript Algorithms and Data Structures** From FreeCodeCamp *2023*
- **Certified for completion of Relational Database** From FreeCodeCamp *2024*
- **Certified for completion of Scientific Computing with Python** From FreeCodeCamp *2024*
